

EMS System Operations**Date: 07/01/2023****Requests for En-Route Rendezvous with LALS/ALS Ambulance****Policy #4180****I. Purpose:**

- A. To establish guidelines for BLS ambulance personnel to request a rendezvous with a LALS/ALS ambulance for patients requiring LALS/ALS treatment during transport.

II. Authority:

- A. California Health and Safety Code – Division 2.5: Emergency Medical Services, Section 1798.

III. Policy:

- A. A BLS ambulance may request to rendezvous with a LALS/ALS ambulance, if available, in accordance with the following.
1. A request for rendezvous may be made if the patient presents with:
 - a. Hypotension
 - a. Term Neonate: < 60 mmHg SBP
 - b. Infants 0-1 year: < 70 mmHg SBP
 - c. Children 1-10 years: < 70 mmHg + (age in years x 2)
 - d. Children > 10 years and Adults: < 90 mmHg SBP
 - b. Airway compromise or impending loss
 - c. Unconsciousness
 - d. At the direction of the Base Hospital Physician or MICN, if it is determined that a rendezvous would benefit a patient who exhibits a life-threatening condition.
- B. A request can be made directly by the BLS ambulance for the situations described above. The request should be made through the appropriate dispatch/communications centers.
- C. The dispatch/communications center will notify the BLS ambulance of the availability and ETA (Estimated Time of Arrival) of the responding LALS/ALS ambulance to the designated rendezvous location (provided by the BLS ambulance).
- D. Transport of the patient by the BLS ambulance should not be delayed to wait for a LALS/ALS ambulance.
- E. The rendezvous shall be as brief as possible with the LALS/ALS provider, with the necessary equipment and supplies for the level of care required, continuing patient care in the BLS ambulance.
- F. LALS ambulances should not request a rendezvous with an ALS ambulance, unless specifically directed to do so by the Base Hospital Physician or MICN. Such a request should occur only in
