

2024 Heat-Related Illness Update

Imperial County Public Health Department
Surveillance: 5/1/2024-6/6/2024

Heat-Related Illness Surveillance

The Imperial County Public Health Department collects data in collaboration with El Centro Regional Medical Center (ECRMC), Pioneers Memorial Healthcare District (PMHD), and the Imperial County Coroner's Office to monitor heat-related illnesses and deaths due to environmental heat exposure. This report includes the most up-to-date data on heat-related illnesses and deaths in the county.

Between May 1st to June 6th, 2024, local hospitals reported a total of 9 cases of heat-related illnesses. Among the cases with known age (n=9), the age range was 28 to 68 years old, with a median age of 42 years. Out of the total cases (n=9), 78% were males. Regarding location, 89% of the individuals were outdoors during the onset of illness. Furthermore, in regards to residency, 11% of the reported cases were homeless, 56% were out-of-county residents, 22% were categorized as unknown due to lack of address information, and 11% were Imperial County residents. Among the cases with available ethnicity information (n=9), 67% were identified as Hispanic. No heat related deaths have been reported. For more detailed information on heat-related illness, please refer to Figure 1 below.

Figure 1. Heat Illness cases by Work Related, Hospitalization, and Age Group

For more information on heat-related illness surveillance, contact the Imperial County Public Health Department at (442)-265-7481.

Heat related Morbidity & Mortality	2024	2023	2022	2021
Heat Stroke	0	4	18	17
Heat Exhaustion	5	87	166	140
Other illnesses (i.e. heat fatigue, dehydration)	4	78	99	89
Deaths	0	22	27	23
Totals	9	191	310	269

Source: El Centro Regional Medical Center, Pioneers Memorial Healthcare District, and Imperial County Coroner.
Note: Heat Surveillance suspended in 2020; no data available

Exposure to high temperatures can cause serious health problems including heat cramps, heat exhaustion, heat stroke, and even death. For more information, go to: [Extreme Heat, Natural Disasters and Severe Weather, CDC.](https://www.cdc.gov/extremehot/)

Hazardous Weather Outlook

Imperial County Public Health Department

Surveillance: 5/1/2024-6/6/2024

Excessive Heat Warning

Wednesday June 12th through Saturday June 15th

Temperatures will range from 107°F to 115°F.

For more information visit the [National Weather Service](https://www.weather.gov)

***Excessive Heat Warning** is issued when an excessive heat event is expected in the next 36 hours. It is issued when an excessive heat event is occurring, is imminent, or there is a very high probability of occurring.

Cool Centers & Hydration Stations

The Imperial County Public Health Department encourages Imperial County residents to take the appropriate precautions during the summer in order to prevent heat-related illnesses.

Imperial County cities will be providing residents with cooling centers and hydration stations this summer.

For locations and hours of operation, visit: icphd.org/coolcenters, or reach out to your local city.

Likelihood of Heat Disorders with Prolonged Exposure or Strenuous Activity

Caution
 Extreme Caution
 Danger
 Extreme Danger

Heat Index: 130+°F	Heat Effect: Heatstroke/sunstroke is highly likely with continued exposure. Recommendations: Avoid strenuous outdoor activity; stay indoors in an air-conditioned facility; stay well hydrated; check on your family, friends, and neighbors.
Heat Index: 105-129°F	Heat effect: Sunstroke, heat exhaustion and heat cramps are likely. Heat stroke is possible with prolonged exposure and/or physical activity. Recommendations: Avoid strenuous outdoor activity; stay indoors in an air-conditioned facility; stay well hydrated.
Heat Index: 90-104°F	Heat Effect: Sunstroke, heat exhaustion and heat cramps are possible with prolonged exposure and/or physical activity. Recommendations: Limit strenuous outdoor activity; limit your time outdoors; stay well hydrated.
Heat Index: 80-89°F	Heat Effect: Fatigue is possible with prolonged exposure and/or physical activity. Recommendations: Limit your time outdoors; stay well hydrated.

Heat index, sometimes referred to as the apparent temperature and given in degrees Fahrenheit, is a measure of how hot it really feels when relative humidity is factored with the actual air temperature.
